

GEEK SQUAD RESTORE DISC DIRECTORY

Ah, time to go back to where you came from huh? Sometimes restoring your computer back to manufacturer specifications is inevitable, and we know sometimes these discs get lost or misplaced. In the event that you do not have your restore discs, we've got your back.

Please have your serial and model numbers readily available when you order restore discs. That information is generally located on the bottom or back of your computer. If requesting a restore disc from Dell, you'll need the Service Tag and Express Service Codes, which are located on the bottom or back of your computer.

Select the appropriate manufacturer from the list below and follow their instructions to order. Process and Delivery varies by manufacturer; please consult with the manufacturer for exact details and pricing. If you have any questions, call 1-800-GEEKSQUAD for assistance.
